## **EDP SIGNS PPAs EARLY TERMINATION AGREEMENTS WITH CONCESSIONARY OF THE PORTUGUESE TRANSMISSION GRID**

Following the information duly conveyed to the financial markets related with the process of early termination of the electricity Power Purchase Agreements ("PPAs"), EDP informs that today, its fully owned subsidiary CPPE – Companhia Portuguesa de Produção de Electricidade, S.A. ("CPPE") and REN – Rede Eléctrica Nacional, S.A. ("REN"), acting as the concessionary of the Portuguese electricity transmission grid, have signed the PPA's termination agreements for all CPPE's power plants operating in the Public Electricity System as foreseen in the Decree-Law 240/2004 of December 27, 2004.

The agreements signed today set the global amount of the compensation to be granted to EDP as a result of the early termination of all of its PPAs, at present value, in Eur. 3.36 billion. This compensation, aimed at ensuring economic benefits equivalent to those delivered by the PPAs to all parties involved in these contracts, was calculated based on a number of economic assumptions and parameters comprised in the abovementioned diploma namely the present value of the existing PPAs, the forecasted revenues of these power plants operating under market conditions and a discount rate that, at present, is of 3.78%.

Completion of the early termination agreements signed between CPPE and REN is subject to the start of an integrated Iberian electricity spot market and the grant of non-binding generation licenses. As such, the value of the compensation to be received by EDP will still be subject to a revision to adjust for the effective termination date of the PPAs as well as to the prevailing sovereign debt interest rate (to determine discount rate) at the time of such termination.
