

Indiana Crossroads Wind Farm I

White County, Indiana

Indiana Crossroads Wind Farm I is located in White County near the town of Wolcott, Indiana. The land surrounding the wind farm consists of corn and soy bean agriculture. The project provides landowners with a stable, weather-resistant cash crop through lease payments with minimal impact on current land use.

302 MW
ONLINE SINCE 2021

Indiana Crossroads Wind Farm I generates an equivalent to the consumption of approximately **80,376 Indiana homes**.¹

Indiana Crossroads I saves more than **537 million gallons** of water each year and prevents the air pollution that causes smog, acid rain, and climate change.²

Economic Benefits

CAPITAL INVESTMENT³
Approximately \$422 million

\$48.5 Million
PAID TO LOCAL GOVERNMENTS

\$84.7 million
PAID TO LANDOWNERS

Millions
SPENT LOCALLY

PERMANENT JOBS⁴
Up to 10 jobs created

CONSTRUCTION JOBS⁴
hundreds of jobs created

Data reflects the estimated amount throughout the life of the project.

Indiana Crossroads Wind Farm consists of **72 Vestas V150 4.2 MW** wind turbines.

Northern Indiana Public Service Company will receive energy from Indiana Crossroads.⁵

Indiana Crossroads Wind Farm I **provides to the national energy security** for the state of Indiana and the United States, helping diversify domestic supply.

Wind is the **largest source** of renewable electricity generation in the United States, **providing 13%** of the country's electricity.⁶

About Us

EDP Renewables North America LLC (EDPR NA), its affiliates, and its subsidiaries develop, construct, own, and operate wind farms and solar parks throughout North America. Headquartered in Houston, Texas, with 58 wind farms, nine solar parks, and eight regional offices across North America, EDPR NA has developed more than 8,800 megawatts (MW) and operates more than 8,200 MW of onshore utility-scale renewable energy projects. With more than 950 employees, EDPR NA's highly qualified team has a proven capacity to execute projects across the continent.

EDPR NA is a wholly owned subsidiary of EDP Renewables (Euronext: EDPR), a global leader in the renewable energy sector. EDPR is the fourth largest renewable energy producer worldwide with a presence in 28 markets across Europe, North America, South America and Asia Pacific. EDPR has a robust development portfolio with first-class assets and a market-leading operational capability in renewables. These include wind onshore, utility scale and distributed solar, wind offshore (through its 50/50 JV - OW) and technologies complementary to renewables such as batteries and green hydrogen.

EDPR is a division of EDP (Euronext: EDP), a leader in the energy transition with a focus on decarbonization. EDP - EDPR's main shareholder - has been listed on the Dow Jones Index for 14 consecutive years, recently being named the most sustainable electricity company on the Index.

¹ Power generation calculated using a 35% capacity factor for wind based on 2019 AWEA Wind Powers America Annual Report. Household consumption based on the 2020 EIA Household Data monthly average consumption by state.

² Assumes 0.58 gallons of water consumed per kWh of conventional electricity from Lee, Han, & Elgowainy, 2016.

³ Assumes the average cost of an installed wind farm is \$1.4 million/MW for projects built after 2018. Based on U.S. DOE 2018 Wind Technologies Market Report.

⁴ Full-time equivalent jobs calculated by dividing number of contractor hours worked during construction by 2080.
