

1.1.6 SUSTAINABILITY ROADMAP

SUSTAINABILITY ROADMAP

At a global level, Sustainability is framed by 17 Sustainable Development Goals defined by the United Nations for the 2015-2030 horizon. In the development of its commitments, EDPR will guide its contributions by 2030 in eight of the seven-teen Sustainable Development Goals.

“ EDPR is aware of the importance of electricity in the sustainable development and is committed to focus not only on the Sustainable Development Goals directly related to its business, such as Climate Action and Affordable and Clean Energy, but also on a business model that positively impacts other SDGs. ”
