

Arbuckle Mountain Wind Farm

Murray & Carter Counties, Oklahoma

⚡ Installed capacity: **100 MW**

🏠 Online since: **2015**

🏠 Generation is equivalent to the average consumption of more than **22,100 Oklahoma homes**.¹

Arbuckle Mountain Wind Farm is located on Oklahoma ranchland among the Arbuckle Mountains in Murray and Carter Counties. The turbines are approximately 15 miles north of Ardmore on the rolling, windy landscape of south central Oklahoma.

Energy security

Power generated at Arbuckle Mountain supports the state of Oklahoma's electric grid. The wind farm contributes to the **energy security for the United States**, helping diversify domestic supply.

Wind energy and land use

Wind turbines have a limited footprint, **leaving 98 percent of the project's leased land undisturbed** and available for farming, wildlife habitat, ranching, or recreation.⁷

Wind energy supports American manufacturing

More than 450 American factories produce parts and materials for the U.S. wind industry, which **employs more than 130,000 Americans**.⁸

Arbuckle Mountain's environmental impact

The wind farm saves more than **177 million gallons** of water each year and prevents the air pollution that causes smog and acid rain.⁹

How wind energy works

EDPR NA uses wind turbines to harness the natural resource of wind to generate mechanical energy. This energy is transformed into electricity via a generator and is sent to the electrical grid after being converted to the proper voltage.

Power grid

Wind is one of the cheapest forms of energy.¹¹

Wind energy provides at least a quarter of the electricity produced in eight states.¹²

Local experience with EDPR NA

“Money isn't everything, but it takes money to make the world go 'round. The community from construction time, the little grocery stores, the tire shops, mechanic shops, gravel truck guys...they all get a little job out of it. And that's just where the money begins. The schools get big money out of it. It's for more than just us landowners, it's for the whole community.”

Leo L., landowner, Texas

¹ Power generation calculated using a 35% capacity factor. Household consumption based on the 2023 EIA Household Data monthly average consumption by state.

² Includes vendor spending, property taxes, and landowner payments through 2024.

³ Cumulative landowner payments through 2024.

⁴ Cumulative local government payments through 2024.

⁵ Cumulative local vendor spending including payments to contractors, suppliers, and service companies, as well as donations within 50-miles of the project area through 2024.

⁶ Full-time equivalent jobs calculated by dividing number of contractor hours worked during construction by 2080.

About us

EDP Renewables North America LLC (EDPR NA), its affiliates, and its subsidiaries develop, construct, own, and operate wind farms and solar parks throughout North America. Headquartered in Houston, Texas, with 61 wind farms, 26 solar parks, and eight regional offices across North America, EDPR NA has developed more than 12,000 megawatts (MW) and operates more than 11,400 MW of onshore utility-scale renewable energy projects. With more than 1,000 employees, EDPR NA's highly qualified team has a proven capacity to execute projects across the continent.
