

# Lone Star Wind Farm

Shackelford and Callahan Counties, Texas

- ⚡ Installed capacity: **386 MW**
- 🏠 Online since: **2007**
- 🏠 Generation is equivalent to the average consumption of more than **83,700 Texas homes**.<sup>1</sup>

Lone Star Wind Farm consists of two phases and is located in west Texas in Shackelford and Callahan Counties, approximately 15 miles northeast of downtown Abilene. With a limited number of rural residences in the area, the land is used primarily for ranching and oil and gas.

## Economic benefits

**\$141.5+ million**  
TOTAL PROJECT IMPACT<sup>2</sup>

**\$43.1+ million**  
PAID TO LOCAL GOVERNMENTS<sup>4</sup>

**\$22.7 million**  
PAID TO LANDOWNERS<sup>3</sup>

**\$75.6+ million**  
SPENT LOCALLY<sup>5</sup>

PERMANENT JOBS<sup>6</sup>  
**44 jobs created**

CONSTRUCTION JOBS<sup>6</sup>  
**Hundreds of jobs created**

### Energy security

Power generated at Lone Star supports the state of Texas' electric grid. The wind farm would contribute to the **energy security for the United States**, helping diversify domestic supply.

### Wind energy and land use

Wind turbines have a limited footprint, **leaving 98 percent of the project's leased land undisturbed** and available for farming, wildlife habitat, ranching, or recreation.<sup>7</sup>

### Wind energy supports American manufacturing

More than 450 American factories produce parts and materials for the U.S. wind industry, which **employs more than 130,000 Americans**.<sup>8</sup>

## Lone Star's environmental impact

The wind farm saves more than **686 million gallons** of water each year and prevents the air pollution that causes smog and acid rain.<sup>9</sup>

## EDPR NA's impact in North America from wind energy<sup>10</sup>

**\$575+ million**  
PAID TO  
LANDOWNERS

**\$558+ million**  
PAID TO LOCAL  
GOVERNMENTS

**7,400+**  
CONSTRUCTION  
JOBS CREATED

**610+**  
PERMANENT  
JOBS CREATED

## How wind energy works

EDPR NA uses wind turbines to harness the natural resource of wind to generate mechanical energy. This energy is transformed into electricity via a generator and is sent to the electrical grid after being converted to the proper voltage.

### Power grid

**Wind is one of the cheapest forms of energy.<sup>11</sup>**

Wind energy provides at least a quarter of the electricity produced in eight states.<sup>12</sup>

## Local experience with EDPR NA

“ I am very proud to be a Texan. Texans have a great mindset. They want to think out of the box. Just like in farming and ranching, you have to be innovative to be competitive. We have enough land here in Texas to take the opportunity to use our natural resources, wind being one of them.

Susan S., Farmer and Cattle Rancher, Texas

## About us

EDP Renewables North America LLC (EDPR NA), its affiliates, and its subsidiaries develop, construct, own, and operate wind farms and solar parks throughout North America. Headquartered in Houston, Texas, with 61 wind farms, 26 solar parks, and eight regional offices across North America, EDPR NA has developed more than 12,000 megawatts (MW) and operates more than 11,400 MW of onshore utility-scale renewable energy projects. With more than 1,000 employees, EDPR NA's highly qualified team has a proven capacity to execute projects across the continent.
